### **INFORMATION**

Lubrinat™ is an intravaginal gel-like moisturizer that naturally restores vaginal moisture, lasting up to 3 days after each application. Lubrinat™ eliminates dry epithelial cells and, when used regularly, restores natural vaginal moisture.

#### **Advantages of using Lubrinat™:**

Lubrinat™ contains no hormones.

Lubrinat™ contains the exact amount to be applied.

Lubrinat™ is an intravaginal moisturizer, which provides continuous moisture (hydration) for up to three days. This helps to eliminate dry epithelial cells and, when used regularly, reestablishes natural moisture; unlike a traditional lubricant that provides temporary lubrication only to reduce friction during sexual intercourse.

Lubrinat™ will make intercourse more comfortable by restoring vaginal moisture.

Lubrinat™ can be used with condoms.

Lubrinat™ contains no fragrance, does not contain parabens, has no flavor and is not aggressive.

#### **What is the Intravaginal Moisturizer with Sodium Hyaluronate?**

It is a non-hormonal gel formulation for the treatment of vaginal dryness, it has sodium hyaluronate, a natural molecule, present in many human tissues and responsible for the maintenance of a correct level of hydration in the tissues, being therefore a natural body reservoir to water, and is responsible for maintaining the correct levels of moisture and hydration in sensitive environments.

The intravaginal moisturizer has sodium lactate, is responsible for the maintenance of vaginal pH between 3.5 and 4.5 physiological, avoiding the proliferation of fungi and local bacteria and eliminating itching, inflammation, bacterial infections and burning due to lack of vaginal hydration.

#### **Who can use it?**

Intravaginal moisturizer with sodium hyaluronate has been specially developed for women suffering from vaginal dryness of various origins whose vaginal epithelium does not produce sufficient hydration and therefore is prone to itching, inflammation, bacterial infections and painful sexual intercourse, as well as after during labor, during menopause, treatments with chemotherapies and periods of stress.

### **What is the composition?**

Sodium hyaluronate, propylene glycol, natrosol 250HHX, sodium benzoate, methyl paraben, sodium lactate, lactic acid, cremophor, deionized water.

### **How to use?**

Applications are recommended every 3 days, reducing application spacing if necessary without damaging the natural flora of the vagina, or as directed by a physician.

### **Instructions for Use - How to apply**

1- Separate an applicator and open the cap of the tube.

2 - To fit the applicator into the nozzle of the tube by tapping it slowly.

3 - After applying the applicator horizontally, gently squeeze the base of the tube with your fingers, forcing the gel into the applicator, filling it to the recommended limit.

4 - Remove the applicator and close the tube.

5 - Lying on your back, with your legs bent, gently insert the applicator into the vagina as deeply as possible and apply the contents of the applicator inside the vagina. The gynecological applicator is disposable, after use it unusable.

### **How do I know I am using the correct amount?**

The disposable applicator that comes with the Intravaginal Moisturizer has a mechanism that, when filled according to instructions, provides 3g of gel, indicated by application.

### **Can it be used as an intimate lubricant before intercourse?**

Yes. However, if applied regularly, there will be no need for the application prior to the sexual act, since the intravaginal moisturizer is a treatment for vaginal dryness.

**Can other vaginal creams be used?**

Use with other vaginal creams should be directed by your doctor.

**How long should it be used?**

It can be used continuously or at the discretion of the physician.

**What precautions to use?**

- Use the Intravaginal Moisturizer under medical supervision.
- Indicated for intravaginal use only.
- The product can be used during menstruation.
- If local irritation occurs, discontinue use and seek medical advice.
- Do not use after expiration date.
